自己紹介

I'm a UI/UX designer with 8 years of experience.
My knowledge of Frontend development helps me efficiently communicate my designs to developers. I'm currently looking to join an existing design team in a company that trusts the design process to deliver meaningful and measurable changes to their customers.

Experience

UI/UX Designer For Comvex
Sept 2016 to present in Japan

- Worked with the Backend, Frontend team, and the production manager to conceptualized and design the new version of the company's main product.
- Improved design quality, consistency, and delivery time by creating a design system, and a documentation site for the company's main product.
- Helped improve the company decision-making process by collecting, and sharing important user and business-related metrics.

Freelance Web Designer/Front-End-Developer
Sept 2015 to July 2016 in Japan

- Designed and developed a high-fidelity web application prototype for pharmaceutical wholesalers using AngularJS and the MEAN stack.
- Designed and developed the E-Commerce website ELSA for Salem Laboratory using Odoo EPR/CRM.
- Banding and design for OSIS a French IT service company specializing in open source technologies.

Web Designer/Front-End-Developer For E.T.I
July 2013 to August 2015 in France

- Designed, developed, and maintained a variety of product, corporate, and E-Commerce websites as well as an in-house CMS.
- Introduce the company to modern workflows including assets optimization and automation via grunt, a custom BEM implementation via Sass.

Web Designer For La Bonne Agence
May 2012 to September 2012 in France

- Designed marketing materials for Orange Music Festival, a promotional campaign organized by Orange, the world's 7th largest mobile operator.
- Designed and developed the front-end of the Nanoatschool website for MINATEC, an international campus for micro and nanotechnology research, home to 3,000 researchers, and 1,200 students.

Education

Web Design & Conception

2011 - 2012 Supcréa Design School in France

Coursework included methodology and project management, visual semiotics, graphic expression techniques, composition, typography, programming, and web design.

Intensive Japanese Lessons

2009 - 2010 OLJ in Japan

Immersed in a full year of Intensive Japanese lessons 4 hours a day, 5 days a week. At the end of my studies, I was able to successfully pass the JLPT N2 test.

Associate's Degree In Economics And Accounting

2007 Pierre Mendès-France Université in France

Coursework included Law Economics, Accounting, Statistics, Social Sciences, and English.
